HOW TO ORDER

Use Our Order Sheet—In making out your order please use the convenient Order Sheet, which is enclosed with each catalogue. If it is necessary to write a letter in addition, let it be on a separate sheet.

Plants—Small plants can be sent by mail if so desired, but we strongly advise our customers to have their plants sent by express at their expense, as larger and finer plants can be sent in this way, and "extras" are added to help defray charges, and we always ship in this way unless instructed to the contrary. Winter blooming plants are generally sent in paper pots.

NO COMPLAINT ENTERTAINED UNLESS MADE WITHIN FIVE DAYS AFTER RECEIPT OF GOODS.

We do not warrant in any way, expressed or implied, the contents or the description, purity, productiveness or any other matter of any seeds, bulbs or plants sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on the above terms no sale is made thereof, and he must return them at once, and the money will be refunded. Subject to the

above conditions we make this sale at the moderate prices at which we sell our goods.

How to Send Money—Send remittance by money order, draft or check. If sent by check add 15c to cover cost of collection. Stamps will be accepted only for orders less than \$1.00. If paper money is sent send it by registered letter. Do not remit with silver money.

Directions—It is most important to have your full name and address on order as plain as possible, and while we exercise the utmost care in filling all orders to the entire satisfaction of the customer, an error is liable to occur at times. In such events, it is our desire to be promptly notified of the fact so we can make such corrections as will be satisfactory. Complaints, if any, should be made immediately upon receipt of goods, so we can place the responsibility and correct the matter in time.

CALLA LILIES

White Calla (Richardia Aethiopica)—The White Calla, or Lily of the Nile, is a well-known plant of easy culture, and in winter is one of our best window plants. To aid profuse blooming keep them dormant from the middle of June until the last of August; repot in good, rich soil, using 6 to 8-inch pot, give water, light and heat in abundance, and the result will be most satisfactory. Bulbs will be forwarded to customers in September or October as they mature. Large roots, **25c** each; **\$2.50** per dozen.

Godfrey's Dwarf—A new Calla of exceptional merit. Grows to height of about 24 inches and the foliage is compact and of a very pretty green. Compared with the ordinary Calla, it gives three blooms to one. **25c** each.

Calla Elliottiana—This is the great new Yellow Calla of marvelous beauty. Flowers are very large, rich, deep golden-yellow, often 4 to 5 inches across the mouth; leaves are spotted with white. Such handsome foliage, together with such remarkable flowers, present a striking appearance indeed. **35c** each, 3 for **\$1.00**.

CHINESE SACRED LILY

Flowers single, white, with yellow center, very freely produced, and are successfully grown in water. Shallow dishes should be used, into which put an inch of gravel; on this set the bulb, fill in with small stones, and keep the dish full of water.

There are many spurious bulbs on the market, but those offered by us are GENUINE—the largest and finest procurable; imported direct.

Price—**20c** each; **\$2.00** per dozen, postpaid. By express, at purchaser's expense—**15c** each; **\$1.75** per dozen.

AMARYLLIS HALLII

A Perfectly Hardy Amaryllis Producing Beautiful Pink Flowers.

Culture—As the bulb is perfectly hardy without any protection it can be planted either in the Fall or Spring, but we consider Fall the best time as the bulbs will have splendid chance to get established before flowering time. GIANT FLOWERING AMARYLLIS

South of St. Louis these Belladonna Lilies will thrive in the open ground if planted 6 inches deep in light, well-drained soil; they will then establish themselves and bloom freely year after year. **35c** each.

Amaryllis Johnsoni

LILIUM HARRISII

(Bermuda Easter Lily)

This grand Lily is without question the best for greenhouse forcing or winter blooming in pots in the house. The flowers are trumpet-shaped, pure waxy-white and exquisitely fragrant. The bulbs should be potted in the early fall, using a very rich soil and kept in a cool, dark place to get a strong root growth before the tops start. Height, about 3 feet. Our first size bulbs will bear from 6 to 12 flowers. Not hardy in our climate.

Price, **50c** each, 6 for **\$2.50**.

HARDY GARDEN LILY

ANNUNCIATION OR ST. JOSEPH LILY

(Lilium Candidum)

Of all the Lilies this is, perhaps, the easiest to grow, and therefore of the most value to amateurs. It is as hardy as a Peony, and never fails to bloom, increasing rapidly and giving more flowers every year, if allowed to remain undisturbed where first planted.

The flowers are of the purest white, borne in large clusters and delightfully fragrant. The bulbs are ready September 1st, and should be planted early.

Extra large bulbs, **20c** each; **\$2.00** per dozen.

IMPROVED GIANT PANSIES

Everyone is fond of Pansies, and every one, rich or poor, should have a bed of them. They are easily grown and a constant delight.

For the largest and finest Pansies, the seed must be sown in the early fall. It is best to plant in the open ground, in August if possible. Transplant the young seedlings to permanent location as soon as large enough, say in September. They will then have time to form good strong roots before the ground freezes. The last of November protect the plants with a covering of leaves or straw about three inches deep. Grown in this manner, early, robust, large-flowering Pansies will result. When the seed is sown later, the young seedlings should be wintered over in cold frames, and will still produce much earlier and larger flowers than from spring-sown seed.

WHITE DUTCH CLOVER

The very best variety for lawns, as it forms a close herbage, never gets so high that the mower cannot be used and remains green throughout the season. Sow at the rate of 5 lbs. per acre when sown alone; half the quantity when sown with other grasses. Per lb., by mail, postpaid, **85c**.

YOUNG'S SUPERIOR MUSHROOM SPAWN

One pound of spawn is enough for a bed 2 by 6 feet.

Mushrooms are considered a great delicacy by everyone and are always in much demand at fancy prices. They can be grown in dark rooms, caves, cellars or under greenhouse benches, where the temperature can be maintained at from 50 to 60 degrees.

We furnish with each order a leaflet, giving com-

**YOUNG'S PLANTS
ARE GOOD, HEALTHY, FRESH
PLANTS—SURE TO THRIVE**

Festiva Maxima Peonies

YOUNG'S PEONIES

MOST POPULAR OF ALL HARDY PLANTS, AND GROWING IN FAVOR.

Everyone knows the old-time "Piney" of our grandmother's garden, and how indispensable they were. Now, since we have many vastly improved varieties, no garden is complete where they are omitted. Being perfectly hardy they endure the severest winters, have no insect pest, and are not subject to diseases of any kind. Once planted they remain, increasing in size from year to year. They begin blooming almost at once, yet they do not reach their highest perfection until about the third season. Are easily grown and do well almost anywhere, but a rich, deep soil and sunny place suits best, producing finer bloom with brighter colors. An abundance of water while growing, and when in bloom, is good also. They are profuse bloomers and rival the finest rose in beautiful colors. Foliage rich and massive; a handsome plant, even when not in bloom, whether planted alone on the lawn or with other plants or shrubs.

PEONIES IN DISTINCT COLORS

We have an elegant collection of peonies in the most distinct and choice colors, and we offer you them in white, pink and crimson shades, all double varieties, at following prices: Choice Mixed Peonies—White varieties, mixed, **30c** each, **\$3.00** dozen; Pink Varieties, mixed, **30c** each, **\$3.00** dozen; Red Varieties, mixed, **40c** each, **\$4.00** dozen.

Superb New and Rare Double Named Varieties of Peonies

Once planted they will last a life-time with little care. They grow from one to three feet high, producing magnificent blooms, which sometimes almost surpass the beauty of the rose. Another point which is largely in their favor is the fact that the plants are never attacked by either insects, animal or fungal diseases. Peonies will succeed in most any kind of soil, but give best results when planted in a deep, rich and somewhat moist loam.

Festiva Maxima (Early White)—The standard of perfection in peonies. Pure white with carmine spots on central petals. Flowers are of immense size, on long stiff stems.

Price: **60c** each. Set, one each of the above kinds, **\$4.00**. By mail add **15c** for postage.

Albate—Pearl white, very large and of excellent variety. Good grower and showy.

MID-SEASON RED

Jacqueminot—Deep red. One of the most beautiful red Peonies. Very prolific grower.

LATE WHITE

Marie Lemoine—Color, ivory-white. Sometimes petals have narrow carmine edges. One of the strongest plants with the largest flowers. Very desirable.

MID-SEASON PINK

Augustin d'Hour—Bomb type. Extremely large, showy, perfectly-built bloom; primary petals narrow and built up close and high. Color very deep, rich, brilliant, solferino-red or violet rose, with slight silvery reflex. Very large, very attractive and very good.

LATE PINK

August Villaume—An extra large flower of magnificent form, very compact, globular rose type. Uniform color throughout, a deep rich violet rose. Fragrant. One of the very best flowers when the year is favorable to it. Took first prize in its class at American Peony Show at Cleveland, Ohio, 1918. Very good.

LATE RED

ANEMONE JAPONICA

(Japanese Windflower)

These beautiful Windflowers are one of the most important hardy plants. While they begin blooming in August they are more especially valuable on account of their continuing in full beauty till cut down by hard frost. All are excellent for cutting, lasting in good condition for many days. The plants grow 2 to 3 feet high, are perfectly hardy if given the protection of 2 or 3 inches of leaves or litter during the winter, and, while they respond freely to liberal feeding, they will succeed in any ordinary garden soil, increasing in beauty from year to year. They can be used in solid beds or borders or clumps planted through the hardy border, which they brighten during the late fall months.

Queen Charlotte—Very large semi-double flowers of La France pink, a color that is rare among hardy plants.

Japonica Alba—Large, snowy-white; very chaste.

THE EVER-BEARING STRAW-BERRIES

You can have Strawberries all summer now. The new ever-bearing variety are just as easy to grow as the common strawberries, yield the same way in June, and they keep on bearing all summer. They are the only strawberries that will give you fruit the first season. They need no special care. Progressive is the best variety of them.

Progressives—We prefer the variety known as "Progressive." It originated in Iowa, and is a cross between one of the French ever-bearing sorts and Senator Dunlap, the best of all the regular American varieties. The Progressive has all the good points of the American parent and the one point of the French parent, continuous bearing. It has come to stay, and the sooner you get started with it the better. Get started this spring by all means.

Superb—The only other ever-bearer we would grow (in addition to the Progressive). The Progressive is too tender to ship well. Superb yields as well, about the same size, and will ship well or stand up over night in the boxes.

Prices on Progressive and Superb, pot-grown plants, **\$1.00** per dozen; 25 for **\$1.75**, **\$6.00** per hundred, by express, not prepaid.

The color is intense crimson maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers. 4 inch only.
